### To Whom It May Concern:

It is my pleasure to recommend M/s Prathit Automation Technologies for engineering consultancy & execution services in process plant automation.

I know Prathit Automation Technologies for past four years. They worked with us on various projects as an automation consultant, and we are satisfied with their work for plant automation requirements.

Prathit Automation Technologies has distinguished themselves by close interaction with our project team, providing technically as well as commercially acceptable design for our critical requirement of the process control system and field instruments. They have developed the necessary engineering documentation as per standard instrumentation documentation practises. Prathit is certainly one of the best companies that I have ever dealt with from the plant automation design perspective.

The qualified/ experienced engineering team from Prathit is good asset, Plant design and installation with respect to various critical process requirements such as

- Instrument and system design as per SIL II
- Design, Installation of Instrumentation and control system on intrinsic safe design.
- Design consideration for Installation of load cell system with rigid support.
- Design of DCS System for batch process with advanced batch process software was carried out successfully to meet industrial standard practises and Ciba internal norms.
- The execution team with Prathit is well acquainted with the standards and practises for installation of various process instruments; they are aware of safety requirements and followed them meticulously while working in the plant.

In addition to doing business with his company for many years, I have known the CEO and founder of Prathit Automation Technologies, Anirudha Telkikar, for over 5 years. He is active member of ISA Maharashtra section, also served as President for ISA Maharashtra Section. Knowing him I am quite comfortable in vouching for him as an individual to work with.

Based on our experience in last four years, I have no hesitation in recommending M/s. Prathit Automation Technologies Private Limited as a company to do business with.

We wish Prathit great success in their future endeavour.
